**NeoXam**

### NeoXam Portal

**Leverage information turning data into insight: NeoXam portal offers efficient and smart data visualization and reporting ecosystem with the required mobility**

Just as investment success is measured in gains and losses, investor confidence in your organization is influenced by business monitoring capability, timeliness and quality of the reports your clients receive. Too much dependence on paper-based reporting and too little application of available technology can detract from your image as an industry leader one who understands and embraces the requirements of investors who must make timely decisions based on the accuracy, timeliness and ease of use of information and reports you provide.

In light of the financial services industry's soaring demand for timely and transparent information availability and reporting, the accuracy and speed of your own reporting capability can be a key challenge – and key differentiator – for your business.

Increasingly, online data visualization and reporting are becoming another "must" for asset servicers to have in their service offering.

**Persistent Challenges Require Innovative Solutions**

With pressures for greater accounting transparency at all time highs, asset managers must quickly master differences in language and accounting standards across different time zones, while responding to the demand for more timely and customized reports that address the myriad distinctions among complex financial instruments.

To succeed in this new world of financial reporting, you know that your organization must shift from providing just "the basics" to offering leading edge reporting solutions geared to fill critical communications gaps that can occur when sudden financial news shock waves are generated.

**NeoXam**

### Fully Integrated Portfolio Management Solution

**HELP YOU MANAGE YOUR PROCESSES**

NeoXam Density is a single solution to cover the entire Front-to-Back value chain.

**REDUCE YOUR TCO**  
(TOTAL COST OF OWNERSHIP)

Our solution is fully STP (Straight-Through-Processing), from order simulation to trade accounting, covering Front-to-Back requirements.

**HELP YOU MANAGE REGULATORY REQUIREMENTS**

Our solutions encompass very powerful engines which enable you to have a smart and comprehensive control of exposures and risks inherited from financial market opened positions.

About NeoXam – NeoXam is a leading financial software company, delivering solutions and services for 150+ customers in 25 countries worldwide. **AVANTGARD**  
Managed Upgrade Service

## MANAGED UPGRADE SERVICE FOR AVANTGARD TREASURY

**Managed Services overview**

In today's marketplace, corporations and complex financial institutions also face a range of common challenges: pressure to generate higher returns with lower costs, increase levels of integration, reduce complexity, increase efficiency, reduce waste, and lower risk. Increased demand on operations results, in many cases, in increased costs and a loss of business. As a result, the business wants to focus on their core value-added work and have service providers take on the non-core activities around a core set of identified information systems. In order to solve these business problems, SunGard AvantGard offers a variety of Managed Services for AvantGard Treasury customers.

**What is the Managed Upgrade Service?**

Upgrades are a regular part of maximizing your investment in SunGard Technology. The Managed Upgrade Service provides a mechanism to pre-define and manage application upgrade spend on an as-needed basis to ensure your business stays current with each new release of SunGard's AvantGard Treasury solutions. By SunGard performing these upgrade activities and budgeting them in advance, any risk associated with upgrade projects is mitigated. The scope of each customer's unique upgrade requirements are identified up front and a predictable monthly fee is agreed for a 10-month service term. Upgrade planning, execution, testing and handover are undertaken in collaboration with our customer stakeholders via the SunGard AvantGard Service Delivery team to ensure a seamless upgrade experience is delivered.

**Business and commercial benefits**

- Minimizes the dependency on costly internal IT support and administrative resources
- Remain operationally aligned with SunGard's Software Development (released Road Maps)
- Timeliness in the provisioning of new features/functionality to support business expansion and growth
- Increased regulatory, risk management, audit, control and compliance adherence
- Divesting of any non-value-added tasks to be able to focus on strategic activities that are core to the business
- Removal of operational risk through the use of a ring-fenced, dedicated service team comprised of trained technical and functional experts
- Enhanced service quality due to focus under a single supplier model
- Keeping pace with innovation in technology, process and operations
- Transparency over the timing and execution of upgrades
- Lower and predictable operating costs

**Fig 1 | IT budget allocation today and two years from today, by development type.**

Development Type	Today	2 years from today
Building to meet customer business needs	16.2%	15.1%
Identifying improved systems for internal use	14.4%	22.6%
Identifying improved systems for external use	15.7%	16.4%
Identifying improved systems for compliance	27.4%	33.3%

**Fig 2 | Many organizations feel in-house IT skills could be better deployed...**
